SCHEDULE 2

LOSS FACTORS

The following loss factors are to be used by Retailers to multiply the kWh recorded on the half-hour meter at each Connected Customer's Installation in order to determine the Electricity Retailer's responsibility for the purchase of kWh within the Distribution Network.

Supply at 11kV (1.05)
Supply at 400V (1.08)

Note:

All prices are exclusive of GST.
Capacity price is assessed on the basis of the measured demand, mains size, LV fuses or transformer capacity.

An additional \$116.82 per kVAr per annum of equivalent corrective capacitance applies if the installation power factor is required to be improved to 0.95.

One street light is considered to be one connection.

Capacity charges and coincident peak demand charges for categories 3 , 4 , and 5 are set annually in advance and payable by monthly installments throughout the year

The delivery price includes the following:

Distribution Price (Westpower)
Transmission Price (Transpower)

- 1 A unit is a kilowatt hour (kWh).
- 2 All fixed charges are attributable to Westpower only.
- 3 The Large Bulk tariff is only available to existing loads as at 1 March 2002.
- 4 Peak Demand charges are charged and reset monthly
- 5 Category 2: Medium load (WP2N) tariff shall apply to all loads greater than 100kVA and less than 200 kVA without TOU meters.

Special Discount 2018

The Board of Westpower has resolved to provide a discount of line charges to consumers of \$3m for 2018. The amount of each consumer's discount will be provided to retailers, and consumers will see the discount on their power accounts in December 2018.
